

KHODJAEV UMAR

BACKEND DEVELOPER

84 Uzar St., Yangihayot, Tashkent

js.with.umar@gmail.com | [Telegram](#) | [Github](#) | [LinkedIn](#) | +998 91 013 03 24

Full Stack Developer specializing in modern JavaScript frameworks such as React.js and Nest.js. Experienced in designing and developing efficient, user-friendly, and scalable web solutions. Strong background in backend architecture, databases, and API development. Continuously learning and adapting to new technologies to deliver high-quality products.

SKILLS

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS

Databases: MongoDB, PostgreSQL, MySQL

Tools & Others: Git, GitHub, REST API, GraphQL

Backend: Node.js, Nest.js, Express.js

Languages: JavaScript (ES6+), TypeScript

DevOps: Docker, CI/CD, Deployment

EXPERIENCE / PROJECTS

Assistant & Support Mentor at [Najot ta'lim](#)

Feb 2025 - Present

- Supported the delivery of Full Stack Development curriculum, including JavaScript, React, Node.js, Express, and MongoDB.
- Mentored and guided 100+ students through hands-on coding exercises, individual assignments, and real-world projects.
- Provided technical support, code reviews, and best practices to improve code quality and problem-solving skills.
- Collaborated with lead instructors in structuring lessons and enhancing the learning experience, resulting in higher student engagement and successful project completions.

Projects

Subscription Tracker – Backend API

- Developed a RESTful API for managing subscriptions with JWT authentication, role-based access, and automated renewal reminders. (Node.js, Express, MongoDB).
- More details available in [GitHub Repository](#).

LMS-course system like udemy

Developed a Learning Management System (LMS) backend similar to Udemy using NestJS, TypeScript, and PostgreSQL. Implemented user authentication (JWT), course and lesson management, category organization, and certificate generation. Designed RESTful APIs with role-based access control, file upload for video lessons, and integrated Swagger for API documentation. Ensured robust validation and error handling throughout the application.
